### EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 11, and 21, the prior art of record does not disclose or reasonably suggest a method, apparatus, and program storage device, wherein a speech classification system utilizes Gaussian mixture models representing both a target and global model, and wherein adaptation utilizes a multidimensional space that is based upon a model set that is selected from the global model. It is known in the prior art to adapt models for speech recognition, where models are Gaussian mixture models. However, the prior art of record does not clearly disclose or reasonably suggest a target model and a global model, where a model set is selected from the global model utilizing a multidimensional space based on the selected model set. The closest art of record, *Chaudhari et al.* ('590), is commonly assigned to International Business Machines, and prior art only under 35 U.S.C. §102(e), so that any combination showing obviousness cannot apply under 35 U.S.C. §103(c). However, *Chaudhari et al.* ('590) does not clearly disclose the limitations of an adaptation utilizing a multidimensional model space that is based upon a selected model set. Applicants' Specification, Page 6, Line 9 to Page 8, Line 6, discloses selecting a set of Gaussian mixture models from a set of global models, which may include the target model, and defining a K-dimensional space such that its bases are constituted by functions on the selected model set. Applicants' Specification, Page 1, Line 12 to Page 2, Line 10, provides an advantage of performing adaptation using smaller amounts of data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
